

What you have

- A 176-concept study guide organized by all 8 CED units College Board units.
- Each concept = term + concise explanation + high-yield exam tip (+ example where useful).
- A table of contents up front so you can jump straight to any unit.
- A closing page with exam-day strategy.

How to use it

- First pass (3-4 weeks before the exam): read every concept in order. Underline anything unfamiliar.
- Second pass (1-2 weeks before): reread only the concepts you underlined.
- Final pass (2-3 days before): rapid-review every tip line -- they are the highest-yield content in the guide.
- Mark the concepts you miss with a dot in the margin and revisit them 48 hours later.
- Pair each unit with a short set of practice questions from your textbook or a question bank.

Exam basics

The AP Calculus AB exam is 3 hours 15 minutes: 45 multiple-choice questions (30 without a calculator in 60 min, 15 with a calculator in 45 min) and 6 free-response questions (2 with a calculator, 4 without, in 105 min total).

This guide is a study companion, not an official College Board publication. It is aligned to the public AP Course and Exam Description and is not affiliated with or endorsed by the College Board.
